

# \$25 REBATE

## On ENERGY STAR® Certified WATER DISPENSER

For purchases made 1/1/22 - 12/31/23

### REBATE REQUIREMENTS

- You are an Appalachian Power residential customer.
- Your residential Appalachian Power account is for an address in the state of West Virginia.
- You purchased a current ENERGY STAR certified water dispenser between 1/1/22 - 12/31/23.
- You have not submitted another Appalachian Power water dispenser rebate within the calendar year.  
*(Each customer is limited to one water dispenser rebate per calendar year.)*
- Application must be submitted within 45 days from purchase date or by January 15 of the following calendar year, whichever comes first.

Does your home score a perfect 10?

TAKE CHARGE™

# Appalachian Power \$25 Rebate

Get \$25 back from Appalachian Power on your purchase of a current ENERGY STAR certified water dispenser. This rebate is good for purchases made 1/1/22 through 12/31/23. Limit one rebate per residential electric account per calendar year. Funding for this program is limited.

Please include a copy of your dated sales receipt and/or invoice from a retailer showing the manufacturer, model number and price of the ENERGY STAR certified water dispenser purchased. Incomplete information will delay or disqualify your rebate. All rebate requests must be postmarked no later than January 15 of the year following your purchase. Please allow up to eight (8) weeks for rebate processing. Some limitations may apply. For more information, call 888-261-4567 or email [takecharge@clearesult.com](mailto:takecharge@clearesult.com).

## Did You Know?

ENERGY STAR certified Water dispensers use about 30 percent less energy than conventional models. This difference could amount to an energy savings of nearly \$70 over the life of the unit.

Water dispensers can offer hot, cold and room temperature water in a variety of new ways, including:

- **Bottom-loading bottled water** units allow you to install the bottled water, spout up, at the bottom of unit. This eliminates the heavy lifting and occasional spills of conventional top-loading units.
- **Point-of-use** units avoid bottled water by using a dedicated line and filtering systems.
- **On-demand** units do not store conditioned water in internal tanks but provide hot and cool water upon request, there by saving energy.
